

We are Team 59 (Boot 2 Boot). We selected first problem statement to develop a solution that leverages technology to enhance financial inclusions, targeting underserved populations.

As a solution, we developed financial website by the name "TRUSTY PAY" which provides the underserved population to use financial technology efficiently through our website. The speciality is that it is easy to use and understandable by providing text to speech (Voice Assistant) to read out the content to the user and we chose picture over texts so that it is easy to use by a person whose not financially well-educated. And also a chatbot to clear the queries of the user.

Thank you...
